

Citrix Certification

Citrix certifications recognize and reward your real-world skills and experience and offer a path for growing your IT skills and career. Available for various job roles and responsibilities, Citrix certifications demonstrate your value to an employer while giving you the IT knowledge and confidence to perform well.

Citrix certifications truly differentiate individuals and organizations by focusing on the right IT skills at the right time. Individuals seeking to validate in-demand skill sets in virtualization and networking will find that Citrix certifications are more relevant than ever.

Citrix designed its certification structure with the IT professional in mind and delivers:

- **Certification by Job Level** – Three levels of IT professional certification, Administrator, Engineer and Architect are offered so you can match your certification path to your job role.
- **Certification by Solution** – Certification paths are available for virtualization and networking solutions, to allow you to validate expertise in technologies most relevant to your career.
- **Certification by Product Specialization** – Specific designations for the latest Citrix products, such as XenDesktop, XenApp, XenServer and NetScaler are offered to prove your competence and skills on the latest enterprise products.

Go to www.citrixtraining.com and learn more about the different ways to gain hands-on Citrix skills and find the training method addressing your individual learning needs.
